Cities and Climate Change - Routledge & CRC Press

Global Cities and Climate Change examines the translocal relations of cities that have made an international effort to collectively tackle climate change. Compared to state-centric terms, international or trans-national relations, trans-local relations look at policies, politics, and interactions of local governments in the globalized world.

Global Cities and Climate Change - Routledge & CRC Press

Climate change has demonstrated, perhaps more than any other environmental concerns, the complexities of the human-nature interrelationship and the need for embedding a far greater environmental consciousness into our social values and norms. A drastic reduction in global greenhouse gas emissions requires a transition to low carbon cities. This demands a better understanding of the ...

Cities on a Finite Planet: Transformative responses to climate change shows how cities can combine high quality living conditions, resilience to climate change,

disaster risk reduction and contributions to mitigation/low carbon development. It also covers the current and potential contribution of cities to avoiding dangerous climate change and is the first book with an in-depth coverage of how ...

Cities on a Finite Planet - Routledge & CRC Press

Climate change is a global phenomenon that largely impacts urban life. Rising global temperatures causes sea levels to rise, increases the number of extreme weather events such as floods, droughts and storms, and increases the spread of tropical diseases. All these have costly impacts on cities' basic services, infrastructure, housing, human livelihoods and health.

Cities and climate change | UNEP - UN Environment Programme

Sustainable travel behaviours have long been sought after in cities around the world, particularly in industrialised countries, but also increasingly in the emerging cities of Asia, South America and Africa. Progress however appears difficult to make as the private car, still largely fuelled by petrol or diesel, remains the mainstream mode of use. Transport is the key sector where carbon ...
