This book builds on conversations between the author educators and other experts in the field, including authors, illustrators and teachers, to explore the benefits of discussions around quality literature within a classroom context that exercises the imagination and generates new ideas and discoveries. The book focuses on a range of strategies that can be utilised to reimagine literacy learning in a 21st century context including parent and teacher talk; active listening; fostering student driven questions; building vocabulary and imagery; and metacognitive talk. These are argued to have a hugely beneficial impact on how children learn to solve problems, engage in complex thought processes, negotiate meaning, as well as learning how to wonder, explore, create and defend ideas. The book also defends the importance of parents, teachers and academics as ' storytellers ' , using their bodies and voices as instruments of engagement and power. It will make compelling reading for students, teachers and researchers working in the fields of education and sociology, particularly those with an interest in creative methods for improving literacy.

*Creative Conversations* uses games to develop the playful uses of the mind that are characteristic of great innovators. You learn how to shift an ordinary conversation into one where you spark off each other's ideas and fresh insights arise. I developed this approach because I often found myself having dull conversations with bright people. The spirit of play was missing. There is more to these creativity techniques than just fun. They help business people cultivate a creative climate and come up with fresh ideas, as well as contributing to team building and collaborative communication. Teachers can use them to help students gain deeper insight into concepts from science, literature and mathematics. And of course playfulness and learning always bring fresh spark into any relationship.

This book works to 'make change strange' from and for the field of theatre and performance studies. Growing from the idea that change is an under-interrogated category that over-determines theatre and performance as an artistic, social, educational, and material practice, the scholars and practitioners gathered here (including specialists in theatre history and literature, educational theatre, youth arts, arts policy, socially invested theatre, and activist performance) take up the question of change in thirty-five short essays.
