Decision Theory Definition

Decision theory (or the theory of choice not to be confused with choice theory) is the study of an agent's choices. Decision theory can be broken into two branches: normative decision theory, which analyzes the outcomes of decisions or determines the optimal decisions given constraints and assumptions, and descriptive decision theory, which analyzes how agents actually make the decisions they do. Decision theory is closely related to the field of game theory and is an interdisciplinary topic, st

Decision theory - Wikipedia

There is, however, virtually complete agreement among decision scientists that it refers to the prerequisites of rational decision-making. In other words, a normative decision theory is a theory about how decisions should be made in order to be rational. 6 fThis is a very limited sense of the word "normative".

Decision Theory (Stanford Encyclopedia of Philosophy)

Introduction to Retail Retail comes from the French word *retailer*, which refers to "cutting off my hands, clip and divide" in terms of tailoring (1365). It first was recorded as a noun with the meaning of a "sale in small quantities" in 1433 (French). Its literal meaning for retail was to "cut off, shred, off my toes paring".[2]
