When hopes are in friction inspiration as well as disappointment occur. Policy makers in Uganda and in international organisations expect health improvements as one of the bonuses of education programs. Families in Eastern Uganda also hope for and experience health - in the local sense of a good life - as part of schooling.

School children do use their education-for example, to mediate for their parents with disrespectful health professionals. Hopes in Friction exemplifies the power of the anthropological gaze to move us outside the narrow confines of educational policy debates, allowing us to re-examine both the dead-ends and promises of schooling.

Hopes in Friction offers a vivid portrait of life and the implementation of Universal Primary Education in Eastern Uganda, based on long-term fieldwork following a group of children as they grow up. The book considers how the actions and hopes of these children and families, to attain what they perceive as 'a good life', are crosscut by political aspirations and projects of schooling and health education.
