International humanitarian law (IHL) protects persons and property affected by armed conflicts. International humanitarian law is the law that governs the conduct of participants during armed conflict. This branch of law aims to regulate the means and methods of warfare as well as to provide protections to those who do not, or who no longer, take part in the hostilities. It is one of the oldest branches of international law and one of enduring relevance today. The Oxford Guide to International Humanitarian Law provides a practical yet sophisticated overview of this important area of law. Written by a stellar line up of contributors, drawn from those who not only have extensive practical experience but who are also regarded as leading scholars of the subject, the text offers a comprehensive and authoritative exposition of the field. The Guide provides professionals and advanced students with information and analysis of sufficient depth to enable them to perform their tasks with understanding and confidence. Each chapter illuminates how the law applies in practice, but does not shy away from the important conceptual issues that underpin how the law has developed. It will serve as a first port of call and a regular reference work for those interested in international humanitarian law.

classification of conflicts in international humanitarian law (IHL), with special focus on the legal impact of armed foreign intervention in civil wars. *Classification of Conflicts in International Humanitarian Law* enriches the discourse on IHL by providing an in-depth analysis of classification of conflicts and examining recent civil wars with foreign interventions, such as the Libyan civil war (2011), Mali civil war (2012-2015) and the ongoing civil war in Yemen.

This is the third edition of this influential and comprehensive handbook. Substantive changes in international humanitarian law have taken place recently, including a progressive development of customary law; and the jurisprudence of national courts, international ad hoc tribunals and the International Criminal Court, which have made a reassessment of this vitally important part of international law both timely and topical. New material is extensively incorporated, including new developments in treaty law, such as the 2010 amendments to the ICC Statute, as well as new topics that have been extensively debated in recent years: direct participation in hostilities; air and missile warfare; belligerent occupation; operational detention; and the protection of the environment in armed conflict. The growing need to consider borderline issues of the law of armed conflict and the interplay of international humanitarian law, human rights, and other branches of international law have led to have led to some material being considered in a new light. The commentary both deepens reflection on such innovations, and critically reconsiders views expressed in earlier editions to provide a contemporary analysis of this changing field. Renowned international lawyers offer a broad spectrum of legal opinions, restating the law in this area, which is applicable worldwide. Issues of human rights in armed conflicts and in post-conflict situations are extensively addressed. Controversial opinions and national and international judgments are documented and discussed. Problems of application of the law in recent military campaigns are assessed and interpreted in a practice-oriented manner. Based on best-practice rules of global importance, this book also sets out an international 'manual' for international humanitarian law in armed conflicts.

This Handbook provides a black letter text of international humanitarian law, along with case analysis and commentary by a team of internationally renowned experts. It also highlights the interplay of international humanitarian law with human rights law, and other branches of international law.

The Companion to International Humanitarian Law offers a much-needed tool for both scholars and practitioners, supplying information accessible enough to enable a variety of users to quickly familiarise themselves with it and sufficiently comprehensive to be a source for reflection and further research for more demanding users. Its aim is to facilitate the practical application of IHL, and be of use to a wide audience interested in or confronted with IHL, ranging from professionals in humanitarian assistance and protection in the field, legal officers and advisers at the national and international level, trainers, academics, scholars, and students.
