## Mathematical Modelling In Biology Lecture Notes

$s = (r - 1) = r$  is an  
stable steady state  
since  $Jf_0((r - 1) = r) = J_2 r_j < 1$ . In  
Figure 1.3 we plot  
this information on  
a diagram of steady  
states, as a function  
of  $r$ , with. stable

# Online Library

## Lecture Notes

Steady states indicated by solid lines and unstable steady states by dashed lines. When  $r = 1$  we have  $(r - 1) = r = 0$ , so both steady states are at  $u$ .

### Mathematical Modelling in Biology Lecture Notes

#### 1.1 What is

# Online Library Lecture Notes

mathematical modelling? Models describe our beliefs about how the world functions. In mathematical modelling, we translate those beliefs into the language of mathematics. This has many advantages 1.

Mathematics is a

# Online Library Lecture Notes

very precise language. This helps us to formulate ideas and identify underlying assumptions. 2.

An Introduction to Mathematical Modelling  
Let  $y(n+1) = 2.2y(n)(1 - (y(n))^2) + 0.3(y(n))^2$ . give the state of the heart at time  $n$ , measured by

# Online Library Lecture Notes

Some sort of potential obtained from Electrocardiograms, (ECGs). If we start the heart at  $y(0) = -0.4$ , it converges rapidly to a stable oscillation. This is shown in figure 4.12.
