Lesson 19 is a math test prep lesson that explains graphing parallel and perpendicular lines, as well as how to check if two lines are parallel or perpendicular and how to find the equation of a line that is parallel or perpendicular to a given line, as part of the Algebra material that many state exams cover.

Lesson 19: Parallel and Perpendicular Lines
Since slope is a measure of the angle of a line from the horizontal, and since parallel lines must have the same angle, then parallel lines have the same slope — and lines with the same slope are parallel. Perpendicular lines are a bit more complicated.
