In Making Things Move, you'll learn how to build moving mechanisms through non-technical explanations, examples, and do-it-yourself projects--from art installations to toys to labor-saving devices. The projects include a drawing machine, a mini wind turbine, a mousetrap powered car, and more, but the applications of the examples are limited only by your imagination.

~~Making Things Move - Interaction Design~~

Making Things Move: DIY Mechanisms for Inventors,  
Hobbyists, and Artists. Making Things Move reveals practical  
mechanical design principles to readers who may have no  
background in engineering and shows how to apply those  
principles through a wide range of sample projects, from art  
installations to toys to labor-saving devices.
