A separate chapter is devoted to Max Hoffman, US importer of Mercedes cars and Karl Wilfert, head of Mercedes passenger car design from the mid-1950s to the early 1970s. He was not only a highly talented, but occasionally also controversial manager. Very few remember him today. Enjoy!

The recovery of Mercedes-Benz in the early post-war years was remarkable and its first prestige model was the 300 saloon. Using this car's engine, transmission and suspension, Mercedes-Benz entered sports car racing. It proved successful, winning the 1952 Le Mans 24-hour race, the Carrera PanAmericana and many other events. The production model made its sensational debut in 1954. 1,400 Gullwing coupes were built between 1954 and 1957. The contents of this book provide a glorious review of these historic Mercedes-Benz sports cars.

Mercedes introduced their first unitary bodied car as the 180 in 1953. The following year the company revealed the 190SL with Plexiglas screen and lightweight doors. Not produced until March 1955 the production cars had bodywork akin to the 300SL and was powered by a 4-cylinder sohc engine of 1897cc. Production lasted until February 1963. Using racing techniques of 'padding lightness' the 300SL was built around a complex tubular chassis that made conventional doors impossible. Thus the Gullwing was born in 1952 as a pure sports/racing car. The production version gained weight with road going features and a slightly redesigned body. Bosch fuel injection helped to get the extra power needed. 1400 coupes were built before being replaced by the roadster in 1957. This is a book of contemporary road tests, technical data, racing, restoration.

The 300SL, the 190SL and the pagoda SL were already legends, when still in production. That has not changed till today. Names like "Gullwing" or "Pagoda" are forever associated with the SL name. Both cars are the foundation on which every new SL still rests today. And the SLK traces its roots back to the 190SL, the car that convinced management in the 1950s that the SL story was worth to be developed further. This reference book covers the complete history of all three versions, discusses a one of a kind 300SL roadster and comes with recent non-Daimler AG color photography. If you want to know more about these iconic Mercedes cars, then this book is for you. **FREE BONUS:** When you have bought this book, you are eligible for a free pdf file of any Mercedes model (such as W108 or W198 or R107 for example) the author has covered in one of his books. Please contact the author through his website (inside the book) and stipulate, which free pdf file you want him to send to you. These three cars are also covered in Bernd S. Koehling's books about Mercedes cars of the 1950s and 1960s. It was suggested to have them covered in a separate book to accompany the other SL book of Bernd S. Koehling: **MERCEDES-BENZ, The modern SL**, available also here on Amazon.
