Students who are beginning studies in technology need a strong foundation in the basics before moving on to more advanced technology courses and certification programs. The Microsoft Technology Associate (MTA) is a new and innovative certification track designed to provide a pathway for future success in technology courses and careers. The MTA program curriculum helps instructors teach and validate fundamental technology knowledge and provides students with a foundation for their careers as well as the confidence they need to succeed in advanced studies. Through the use of MOAC MTA titles you can help ensure your students future success in and out of the classroom. Database Administration Fundamentals covers introductory knowledge and skills including: relational databases; core database concepts; relational database concepts; security requirements for databases and the data stored in them; database objects – such as tables and views; graphical tools and T-SQL scripts; database queries; and stored procedures.

> The Microsoft Technology Associate MTA certification is an entry-level certification which serves as a good starting point for students and educators who may eventually progress to the Microsoft Technology Specialist MCTS or higher programs. Simply put, it assesses the foundational knowledge necessary to pursue MCTS, MCITP or MCPD certifications. The certification focuses more on knowledge and a little less on skills. However, the knowledge areas are all based on MS products so you must know those products inside and out. Questions on the general knowledge are relatively easy. Product and technology specific technical questions, however, are way more difficult. This is why we developed this study product - we focus on those difficult topics that involve difficult technical skills. We want you to be able to answer these difficult questions and secure exam success accordingly. Exam 98-364: Database Fundamentals is designed to allow candidates to assess their knowledge of and skills with SQL Server databases and operations. Topics covered include: Understanding Core Database Concepts Creating Database Objects Manipulating Data Understanding Data Storage Administering a Database

Complete coverage of the Microsoft Technology Associate exam 98-364. Starting form zero, this book is intended for everyone studying for the MTA Database Fundamentals exam, and everybody interested in learning about SQL Server in general. Using screen shots and sample code, this book delivers all the relevant information in the easiest way. It also includes test questions and exam tips. After studying this book, you'll have learnt a lot about databases in general, SQL Server in particular and be ready for the exam!

The Microsoft Technology Associate MTA certification is an entry-level certification which serves as a good starting point for students and educators who may eventually progress to the Microsoft Technology Specialist MCTS or higher programs. Simply put, it assesses the foundational knowledge necessary to pursue MCTS, MCITP or MCPD certifications. The certification focuses more on knowledge and a little less on skills.
