Owning a jet ski means not only having lots of fun on the water but also regular maintenance. That involves proper cleaning and inspection of your machine. Your Polaris SL 750 is an undoubtedly reliable machine, but its parts are still susceptible to wear and tear as well as damage caused by the elements. Since the tiniest faulty unit may lead to serious and costly repairs, it is essential to replace all worn components of your machine without delay.

An exciting fantasy novel for 8 to 12 year olds involving enchantment, mystery and a garden gnome. To the boy called Red, it seems the most marvellous escape he could wish for: a gift that grants him more freedom than he ever believed possible - the chance to fly, to soar with the gulls, high over the tall brick walls that have imprisoned him for so long. But this gift comes with a terrible price - and puts him in grave danger. Is there anyone Red can trust to help him? The curious Captain Bass who has strange powers of his own? The wildly unpredictable twin sisters he is strongly drawn to? In this magical, mysterious story, Red's adventure is like a chamber of mirrors at a carnival - a dazzling and breathtaking tale. 'This is a rich fantasy - alive with original twists, surprises and mysteries which I dare not reveal. Children's Literature is about to be enriched with a new classic.' Margaret Mahy

Tens of thousands of mechanical engineers are engaged in the design, building, upgrading, and optimization of various material handling facilities. The peculiarity of material handling is that there are numerous technical solutions to any problem. The engineer ' s personal selection of the optimal solution is as critical as the technical component. Michael Rivkin, Ph.D., draws on his decades of experience in design, construction, upgrading, optimization, troubleshooting, and maintenance throughout the world, to highlight topics such as: •

physical principles of various material handling systems; • considerations in selecting technically efficient and environmentally friendly equipment; • best practices in upgrading and optimizing existing bulk material handling facilities; • strategies to select proper equipment in the early phases of a new project. Filled with graphs, charts, and case studies, the book also includes bulleted summaries to help mechanical engineers without a special background in material handling find optimal solutions to everyday problems.

The true story of a killer nurse whose crimes were hidden by a hospital for years. It ' s 1980, and Genene Jones is working the 3 to 11 PM shift in the pediatric ICU in San Antonio's county hospital. As the weeks go by, infants under her care begin experiencing unexpected complications—and dying—in alarming numbers, prompting rumors that there is a murderer among the staff. Her eight-hour shift would come to be called “ the death shift. ” This strange epidemic would continue unabated for more than a year, before Jones is quietly sent off—with a good recommendation—to a rural pediatric clinic. There, eight children under her care mysteriously stopped breathing—and a 15-month-old baby girl died. In May 1984, Jones was finally arrested, leading to a trial that revealed not only her deeply disturbed mind and a willingness to kill, but a desire to play “ God ” with the lives of the children under her care. More shocking still was that the hospital had shredded records and remained silent about Jones ' horrific deeds, obscuring the full extent of her spree and prompting grieving parents to ask: Why? Elkind chronicles Jones ' rampage, her trials, and the chilling aftermath of one of the most horrific crimes in America, and turns his piercing gaze onto those responsible for its cover-up. It is a tale with special relevance today, as prosecutors, distraught parents, and victims ' advocates struggle to keep Jones behind bars. “ A horrifying true-life medical thriller... ” —Publishers Weekly “ Gripping...A remarkable journalistic achievement! ” —Newsweek “ Murder, madness, and medicine...superb! ” —Library Journal “ Shocking...true crime reporting at its most compelling. ” —Booklist
